NAME

coe − set close-on-exec flag for a descriptor

SYNTAX

#include <coe.h>

int **coe**(*fd*);

int *fd*;

DESCRIPTION

coe sets the close-on-exec flag for file descriptor *fd*, returning 0 if it was successful or -1 on error. If **coe** is successful, *fd* will be closed when the process calls **execve**.

SEE ALSO

execve(2), fcntl(2)
